SUMMARY

Web developer with a background in electronic music, multimedia arts, and education, combining creativity with technical expertise. Specializes in the intersection between full-stack web development and UI design, with a focus on user-centric web applications. Brings openness, empathy, and excellent communication skills.

DEVELOPMENT PROJECTS

CUB Film Data | Full-Stack Application
08/2023-03/2024
- Set up a MongoDB database to store movie data and user information
- Built and deployed a REST API (Node.js, Express, Mongoose) with Postman-tested endpoints on Heroku
- Designed and built two responsive frontend apps (React & Angular) for user accounts, film search, and favourites

(live) (code)

Meet App
11/2023
- Developed a React PWA using the Google Calendar API to display events
- Followed a test-driven workflow using Jest, Cucumber, and Puppeteer
- Implemented OAuth login using AWS Lambda for secure authentication

(live) (code)
